Basic Operation Guide

Please read the Operation Guide before using this machine. Keep it close to the machine for easy reference.
This Operation Guide is for 1650, 2050, and 2550. This Operation Guide mentions that 1650 is a 16 ppm (prints per minute) model, 2050 is a 20 ppm (prints per minute) model, and 2550 is a 25 ppm (prints per minute) model.

**Note** This Operation Guide contains information that corresponds to using both the inch and metric versions of this machine.

This Operation Guide shows messages of the inch version. When using the metric version, see the messages of the inch version for reference. With regard to the messages in the text, if a message has only the difference of upper- and lower-case spelling, we show only the message of the inch version. When there is even a slight difference in the message, we have listed the information for the inch version followed, in brackets, by the corresponding information for the metric version.

Index ..................................................................................... Index-1
MAKING FULL USE OF THE ADVANCED FUNCTIONS OF THIS MACHINE

1 Automatic selection of the copy paper of the same size as the original
   <Auto paper selection mode>
   (See page 3-2.)

2 Reduction/enlargement for a specified cassette size <Auto zoom ratio selection mode>
   (See page 3-5.)

3 Reduction/enlargement in the range from 25 to 200 % <Zoom mode>
   (See page 3-6.)

4 One-touch selection of the copy magnification ratio <Preset zoom mode>
   (See page 3-8.)

5 Making 2-sided copies from various types of originals <Duplex copying>
   (See page 3-9.)

6 Copying two-page originals onto separate sheets <Split copying>
   (See page 3-12.)

7 Automatic sorting of copy sets <Sort copying>
   (See page 3-15.)

8 Change of orientation of copies by set <Offset copying>
   (Refer to Chapter 1 in Advanced Operation Guide, Offset Copying.)

9 Combination of two or four originals onto a single copy page <Combine copying>
   (See page 3-17.)
10 Making a margin space on copies <Margin mode>
(Refer to Chapter 1 in Advanced Operation Guide, Margin Mode.)

11 Making copies with clean edges <Border erase mode>
(Refer to Chapter 1 in Advanced Operation Guide, Border Erase Mode.)

12 Copying a large volume of originals in one operation <Continuous copying>
(Refer to Chapter 1 in Advanced Operation Guide, Continuous Copying.)

13 Memorizing copy settings <Program function> (Refer to Chapter 1 in Advanced Operation Guide, Program Function.)

14 Selection of the language used in the message <Language setting> (See page 2-23.)

15 Using ID-codes to control the number of copies made <Job accounting mode>
(Refer to Chapter 4 in Advanced Operation Guide.)

16 Full range of optional equipment
Document processor (See page 4-1.)

Paper feeder (See page 4-5.)

Duplex unit (See page 4-5.)

Finisher (See page 4-6.)

Job separator (See page 4-9.)

Key counter (See page 4-10.)
Fax kit (See page 4-10.)

Network scanner kit (See page 4-10.)

Memory card (CompactFlash) (See page 4-11.)

Hard Disk (See page 4-11.)

Additional memory (See page 4-11.)
Notice

The information in this guide is subject to change without notification. Additional pages may be inserted in future editions. The user is asked to excuse any technical inaccuracies or typographical errors in the present edition.

No responsibility is assumed if accidents occur while the user is following the instructions in this guide. No responsibility is assumed for defects in the printer’s firmware (contents of its read-only memory).

This guide, any copyrightable subject matter sold or provided with or in connection with the sale of the machine, are protected by copyright. All rights are reserved. Copying or other reproduction of all or part of this guide, any copyrightable subject matter without the prior written consent of Kyocera Mita Corporation is prohibited. Any copies made of all or part of this guide, any copyrightable subject must contain the same copyright notice as the material from which the copying is done.

Regarding Tradenames

PRESCRIBE is a registered trademark of Kyocera Corporation. KPDL and KIR (Kyocera Image Refinement) are trademarks of Kyocera Corporation.

Diablo 630 is a product of Xerox Corporation. IBM Proprinter X24E is a product of International Business Machines Corporation. Epson LQ-850 is a product of Seiko Epson Corporation. Hewlett-Packard, PCL, and PJL are registered trademarks of Hewlett-Packard Company. Centronics is a trade name of Centronics Data Computer Corp. PostScript is a registered trademark of Adobe Systems Incorporated. Macintosh is a registered trademark of Apple computer, Inc. Microsoft, Windows, and Windows NT are registered trademarks of Microsoft Corporation. PowerPC is a trademark of International Business Machines Corporation. ENERGY STAR is a U.S. registered mark. All other brand and product names are registered trademarks or trademarks of their respective companies.

CompactFlash and CF are trademarks of SanDisk Corporation of America.

The Kyocera product uses PeerlessPrintXL to provide the HP LaserJet compatible PCL6 language emulation. PeerlessPrintXL is a trademark of The Peerless Group, Redondo Beach, CA 90278, U.S.A.

AGFA This product contains UFST™ and MicroType® from Agfa Monotype Corporation.

Legal Restriction On Copying

• It may be prohibited to copy copyrighted material without permission of the copyright owner.
• It is prohibited under any circumstances to copy domestic or foreign currencies.
• Copying other items may be prohibited.
We have determined as a participating company in the International Energy Star Program that this product is compliant with the standards laid out in the International Energy Star Program.

**About the International Energy Star Program**

International Energy Star Program has as its basic goals the promotion of efficient energy use and the reduction of the environmental pollution that accompanies energy consumption by promoting the manufacture and sale of products that fulfill program standards.

**Low Power Mode**

The device automatically enters Low Power Mode when 9 minutes have passed since the device was last used. The amount of time of no activity that must pass before Low Power Mode is activated may be lengthened. See Low Power Mode on page 3-23 for more information.

**Sleep Mode**

The device automatically enters Sleep Mode when 19 minutes have passed since the device was last used. The amount of time of no activity that must pass before Sleep Mode is activated may be lengthened. For more information see Sleep Mode on page 3-24.

**Automatic 2-Sided Copy Function**

The Energy Star Program encourages the use of 2-sided copying which reduces the load on the environment. Your sales or service representative can provide information about adding 2-sided copying capabilities to this device.

**Paper Recycling**

The Energy Star Program encourages the use of environmentally friendly recycled paper. Your sales or service representative can provide information about recommended paper types.
Please read this Operation Guide before using this machine. Keep it close to the machine for easy reference.

The sections of this guide and parts of the machine marked with symbols are safety warnings meant to protect the user, other individuals and surrounding objects, and ensure correct and safe usage of the machine. The symbols and their meanings are indicated below.

**DANGER:** Indicates that serious injury or even death will very possibly result from insufficient attention to or incorrect compliance with the related points.

**WARNING:** Indicates that serious injury or even death may result from insufficient attention to or incorrect compliance with the related points.

**CAUTION:** Indicates that personal injury or mechanical damage may result from insufficient attention to or incorrect compliance with the related points.

Symbols

The △ symbol indicates that the related section includes safety warnings. Specific points of attention are indicated inside the symbol.

警告 [General warning]

警告 [Warning of danger of electrical shock]

警告 [Warning of high temperature]

The ⊘ symbol indicates that the related section includes information on prohibited actions. Specifics of the prohibited action are indicated inside the symbol.

禁止 [Warning of prohibited action]

禁止 [Disassembly prohibited]
The ● symbol indicates that the related section includes information on actions which must be performed. Specifics of the required action are indicated inside the symbol.

- [Alert of required action]

- [Remove the power plug from the outlet]

- [Always connect the machine to an outlet with a ground connection]

Please contact your service representative to order a replacement if the safety warnings in this Operation Guide are illegible or if the guide itself is missing. (fee required)
IMPORTANT! PLEASE READ FIRST.

⚠️ CAUTION LABELS

Caution labels have been attached to the machine at the following locations for safety purposes. Be sufficiently careful to avoid fire or electric shock when removing a paper jam or when replacing toner.

Label 1
High temperature inside. Do not touch parts in this area, because there is a danger of getting burned.

Label 2
High temperature inside. Do not touch parts in this area, because there is a danger of getting burned.

Label 3
High voltage inside. Never touch parts in this area, because there is a danger of electric shock.

Label 4
High temperature inside. Do not touch parts in this area, because there is a danger of getting burned.

NOTE: Do not remove these labels.
INSTALLATION PRECAUTIONS

Environment

Caution

Avoid placing the machine on or in locations which are unstable or not level. Such locations may cause the machine to fall down or fall over. This type of situation presents a danger of personal injury or damage to the machine.

Avoid locations with humidity or dust and dirt. If dust or dirt become attached to the power plug, clean the plug to avoid the danger of fire or electrical shock.

Avoid locations near radiators, heaters, or other heat sources, or locations near flammable items, to avoid the danger of fire.

To keep the machine cool and facilitate changing of parts and maintenance, allow access space as shown below. Leave adequate space, especially around the vents, to allow air to be properly ventilated out of the machine.

Other precautions

Adverse environmental conditions may affect the safe operation and performance of the machine. Install in an air-conditioned room (recommended room temperature: around 73.4 °F (23 °C), humidity: around 50 %), and avoid the following locations when selecting a site for the machine.

- Avoid locations near a window or with exposure to direct sunlight.
- Avoid locations with vibrations.
- Avoid locations with drastic temperature fluctuations.
- Avoid locations with direct exposure to hot or cold air.
- Avoid poorly ventilated locations.
If the floor is delicate, when this product is moved after installation, the floor material may be damaged.

During copying, some ozone is released, but the amount does not cause any ill effect to one’s health. If, however, the machine is used over a long period of time in a poorly ventilated room or when making an extremely large number of copies, the smell may become unpleasant. To maintain the appropriate environment for copy work, it is suggested that the room be properly ventilated.

**Power supply/Grounding the machine**

**Warning**

Do not use a power supply with a voltage other than that specified. Avoid multiple connections in the same outlet. These types of situations present a danger of fire or electrical shock.

Plug the power cord securely into the outlet. If metallic objects come in contact with the prongs on the plug, it may cause a fire or electric shock.

Always connect the machine to an outlet with a ground connection to avoid the danger of fire or electrical shock in case of an electric short. If an earth connection is not possible, contact your service representative.

**Other precautions**

Connect the power plug to the closest outlet possible to the machine.

The power supply cord is used as the main disconnect device. Ensure that the socket/outlet is located/installed near the equipment and is easily accessible.

**Handling of plastic bags**

**Warning**

Keep the plastic bags that are used with the machine away from children. The plastic may cling to their nose and mouth causing suffocation.

**PRECAUTIONS FOR USE**

**Cautions when using the machine**

**Warning**

Do not place metallic objects or containers with water (flower vases, flower pots, cups, etc.) on or near the machine. This situation presents a danger of fire or electrical shock should they fall and spill liquids inside.

Do not remove any of the covers from the machine as there is a danger of electrical shock from high voltage parts inside the machine.
Do not damage, break or attempt to repair the power cord. Do not place heavy objects on the cord, pull it, bend it unnecessarily or cause any other type of damage. These types of situations present a danger of fire or electrical shock.

Never attempt to repair or disassemble the machine or its parts as there is a danger of fire, electrical shock or damage to the laser. If the laser beam escapes, there is a danger of it causing blindness.

If the machine becomes excessively hot, smoke appears from the machine, there is an odd smell, or any other abnormal situation occurs, there is a danger of fire or electrical shock. Turn the main power switch off (O) immediately, be absolutely certain to remove the power plug from the outlet and then contact your service representative.

If anything harmful (paper clips, water, other fluids, etc.) falls into the machine, turn the main power switch off (O) immediately. Next, be absolutely certain to remove the power plug from the outlet to avoid the danger of fire or electrical shock. Then contact your service representative.

Do not remove or connect the power plug with wet hands, as there is a danger of electrical shock.

If the machine becomes excessively hot, smoke appears from the machine, there is an odd smell, or any other abnormal situation occurs, there is a danger of fire or electrical shock. Turn the main power switch off (O) immediately, be absolutely certain to remove the power plug from the outlet and then contact your service representative.

If anything harmful (paper clips, water, other fluids, etc.) falls into the machine, turn the main power switch off (O) immediately. Next, be absolutely certain to remove the power plug from the outlet to avoid the danger of fire or electrical shock. Then contact your service representative.

Do not remove or connect the power plug with wet hands, as there is a danger of electrical shock.

Always contact your service representative for maintenance or repair of internal parts.

**Caution**

Do not pull the power cord when removing it from the outlet. If the power cord is pulled, the wires may become broken and there is a danger of fire or electrical shock. (always grasp the power plug when removing the power cord from the outlet.)

Always remove the power plug from the outlet when moving the machine. If the power cord is damaged, there is a danger of fire or electrical shock.

If the machine will not be used for a short period of time (overnight, etc.), turn the main power switch off (O). If it will not be used for an extended period of time (vacations, etc.), remove the power plug from the outlet for safety purposes during the time the machine is not in use.

Always hold the designated parts only when lifting or moving the machine.

For safety purposes, always remove the power plug from the outlet when performing cleaning operations.

If dust accumulates within the machine, there is a danger of fire or other trouble. It is therefore recommended that you consult with your service representative in regard to cleaning of internal parts. This is particularly effective if accomplished prior to seasons of high humidity. Consult with your service representative in regard to the cost of cleaning the internal parts of the machine.

**Other precautions**

Do not place heavy objects on the machine or cause other damage to the machine.

Do not open the upper front cover, turn off the main power switch, or pull out the power plug during copying.

When lifting or moving the machine, contact your service representative.
Do not touch electrical parts, such as connectors or printed circuit boards. They could be damaged by static electricity.

Do not attempt to perform any operations not explained in this handbook.

**Caution:** Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Do not look directly at the light from the scanning lamp as it may cause your eyes to feel tired or painful.

**Other precautions (for users in California, the United States)**

This product contains a CR Coin Lithium Battery which contains Perchlorate Material - special handling may apply. See [www.dtsc.ca.gov/hazardouswaste/perchlorate](http://www.dtsc.ca.gov/hazardouswaste/perchlorate).

**Cautions when handling consumables**

⚠️ **Caution**

Do not attempt to incinerate the toner container or the waste toner box. Dangerous sparks may cause burns.

Keep the toner container and the waste toner box out of the reach of children.

If toner happens to spill from the toner container or the waste toner box, avoid inhalation and ingestion, as well as contact with your eyes and skin.

- If you do happen to inhale toner, move to a place with fresh air and gargle thoroughly with a large amount of water. If coughing develops, contact a physician.
- If you do happen to ingest toner, rinse your mouth out with water and drink 1 or 2 cups of water to dilute the contents of your stomach. If necessary, contact a physician.
- If you do happen to get toner in your eyes, flush them thoroughly with water. If there is any remaining tenderness, contact a physician.
- If toner does happen to get on your skin, wash with soap and water.

DO NOT attempt to force open or destroy the toner container or the waste toner box.

**Other precautions**

After use, ALWAYS dispose of the toner container and the waste toner box in accordance with Federal, State and Local rules and regulations.

Store all consumables in a cool, dark location.

If you will not be using the copier for a prolonged period of time, remove all paper from the cassette and the multi-bypass tray and seal in its original packaging.
SAFETY OF LASER BEAM

1. Safety of laser beam

This copier has been certified by the manufacturer to Class 1 level under the radiation performance standards established by the U.S. DHHS (Department of Health and Human Services) in 1968. This indicates that the product is safe to use during normal operation and maintenance. The laser optical system, enclosed in a protective housing and sealed within the external covers, never permits the laser beam to escape.

2. The CDRH Act

A laser-product-related act was implemented on Aug. 2, 1976, by the Center for Devices and Radiological Health (CDRH) of the U.S. Food and Drug Administration (FDA). This act prohibits the sale of laser products in the U.S. without certification, and applies to laser products manufactured after Aug. 1, 1976. The label shown below indicates compliance with the CDRH regulations and must be attached to laser products marketed in the United States. On this copier, the label is on the right.

3. Optical unit

When checking the optical unit, avoid direct exposure to the laser beam, which is invisible. Shown at below is the label located on the cover of the optical unit.

4. Maintenance

For safety of the service personnel, follow the maintenance instructions in the other section of this manual.

5. Safety switch

The power to the laser unit is cut off when the upper front cover is opened.
Safety Instructions Regarding the Disconnection of Power

**Caution** The power plug is the main isolation device! Other switches on the equipment are only functional switches and are not suitable for isolating the equipment from the power source.

**Attention** Le débranchement de la fiche secteur est le seul moyen de mettre l’appareil hors tension. Les interrupteurs sur l’appareil ne sont que des interrupteurs de fonctionnement: ils ne mettent pas l’appareil hors tension.

**WARNING**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**CAUTION** — The changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

* The above warning is valid only in the United States of America.
1. Kyocera Mita America, Inc. and Kyocera Mita Canada, Ltd. (both referred to as "Kyocera") warrants the Customer's new Multifunctional Product (referred to as "MFP"), and the new accessories installed with the initial installation of the MFP, against any defects in material and workmanship for a period of one (1) year, or 150,000 copies/prints from date of installation by an Authorized Kyocera Dealer for the 1650/2050, or 300,000 copies/prints from date of installation by an Authorized Kyocera Dealer for the 2550, whichever first occurs. In the event the MFP or an accessory is found to be defective within the warranty period, Kyocera's only obligation and the Customer's exclusive remedy shall be replacement of any defective parts. It is understood that Kyocera shall have no obligation to furnish labor.

2. This warranty is valid only as to the original retail purchaser (referred to as the "Customer") of a new Kyocera MFP in the United States of America or Canada, based upon the country of purchase.

3. In order to obtain performance of this warranty, the Customer must immediately notify the Authorized Kyocera Dealer from whom the product was purchased. If the Kyocera Dealer is not able to provide service, write to Kyocera at the address below for the name and address of the Authorized Kyocera Dealer in your area or check our Website at www.kyoceramita.com/us.

4. This warranty does not cover MFP's or accessories: (a) which have become damaged due to operator negligence, misuse, accidents, improper storage or unusual physical or electrical stress, (b) which have used parts or supplies which are not genuine Kyocera brand parts or supplies, (c) which have been serviced by a technician not employed by Kyocera or an Authorized Kyocera Dealer, or (d) which have had the serial number modified, altered, or removed.

5. This warranty does not cover Maintenance Kits or the components of Maintenance Kits, which consist of the drum unit, the fixing unit, and the developing unit. Kyocera shall give the Customer a separate warranty for these items.

6. This warranty gives the Customer specific legal rights. The Customer may also have other rights, which vary from state to state, or province to province. Neither the seller, nor any other person is authorized to extend the time period, or expand this warranty on behalf of Kyocera.

7. THIS WARRANTY IS MADE IN LIEU OF ALL OTHER WARRANTIES AND (CONDITIONS), EXPRESS OR IMPLIED, AND KYOCERA SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTY (OR CONDITION) OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY SHALL NOT EXTEND TO, AND KYOCERA SHALL NOT BE LIABLE FOR, ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES WHICH MAY ARISE OUT OF THE USE, OR INABILITY TO USE, THE MFP.

KYOICERA MITA AMERICA, INC.  KYOCERA MITA CANADA, LTD.
Headquarters:  6120 Kestrel Road, Mississauga,

xvii
Guide to this Operation Guide

This operation guide has the following chapters. The content of these chapters is summarized below to be used as a reference.

1 Names of Parts
This chapter contains explanations on the names and functions of the parts of the machine and its operation panel.

2 Preparations
This chapter contains explanations on procedures for loading paper and connection of this product.

3 Basic Operation
This chapter contains explanations on the basic procedures of simple copying and printing.

4 Optional Equipment
This chapter contains explanations on the optional equipment that can be used with this product.

5 Maintenance
This chapter contains explanations on replacement of the toner container and the waste toner box and maintenance of this product.

6 Troubleshooting
This chapter contains explanations on handling problems that may occur, for example, when an error message appears or if a paper jam occurs.

Appendix
The appendix explains the specifications of this product.
Guides Supplied with This Machine

The following guides are supplied with this machine. Refer to the guides as needed.

Basic Operation Guide (this guide)
This Basic Operation Guide contains explanations on the procedures for loading paper and connection of this product, the basic procedures of copying and printing, and troubleshooting.

Advanced Operation Guide
The Advanced Operation Guide contains explanations on copier and printer functions as well as default settings that can be adjusted on this machine.

KX Printer Driver Installation Guide
This guide describes the procedure to install the printer driver software.

KX Printer Driver Operation Guide
This guide describes how to install and set the printer driver software.

PRESCRIBE Commands Technical Reference
PRESCRIBE is the native language of the Kyocera Mita printers. This Technical Reference contains the information about how the printing is performed using the PRESCRIBE commands as well as the font and emulation description. Also included is a list of permanent parameters and their explanation needed when customizing your printer.

PRESCRIBE Commands Command Reference
Gives a detailed explanation of the PRESCRIBE command syntax and parameters with the aid of print examples.
Conventions

This guide uses the following conventions:

**Bold** indicates key names.

**Courier** indicates content of the message display.

**Note** contain important information aside from the text.

**Italic** refers to another page or other guide.

---

**Preparations**

**Network (TCP/IP) Settings**

Register the IP address of this machine.

1. Press the **Printer** key.

2. Press the **▲** key or the **▼** key to select **MENU**.

3. Press the **Enter** key.

**Notes**

- The IP address that should be registered here differs depending upon your network environment. Check with your network administrator before performing this setting.

- If you use the following procedure to manually register the IP address, be sure to turn the **DHCP** and **BOOTP** settings off and the **TCP/IP** setting on. (For details, refer to the **Advanced Operation Guide**.)
IBM PROGRAM LICENSE AGREEMENT

THE DEVICE YOU HAVE PURCHASED CONTAINS ONE OR MORE SOFTWARE PROGRAMS (“PROGRAMS”) WHICH BELONG TO INTERNATIONAL BUSINESS MACHINES CORPORATION (“IBM”). THIS DOCUMENT DEFINES THE TERMS AND CONDITIONS UNDER WHICH THE SOFTWARE IS BEING LICENSED TO YOU. IF YOU DO NOT AGREE WITH THE TERMS AND CONDITIONS OF THIS LICENSE, THEN WITHIN 14 DAYS AFTER YOUR ACQUISITION OF THE DEVICE YOU MAY RETURN THE DEVICE FOR A FULL REFUND. IF YOU DO NOT SO RETURN THE DEVICE WITHIN THE 14 DAYS, THEN YOU WILL BE ASSUMED TO HAVE AGREED TO THESE TERMS AND CONDITIONS.

The Programs are licensed not sold. IBM, or the applicable IBM country organization, grants you a license for the Programs only in the country where you acquired the Programs. You obtain no rights other than those granted you under this license.

The term “Programs” means the original and all whole or partial copies of it, including modified copies or portions merged into other programs. IBM retains title to the Programs. IBM owns, or has licensed from the owner, copyrights in the Programs.

1. License

Under this license, you may use the Programs only with the device on which they are installed and transfer possession of the Programs and the device to another party. If you transfer the Programs, you must transfer a copy of this license and any other documentation to the other party. Your license is then terminated. The other party agrees to these terms and conditions by its first use of the Program.

You may not:

1) use, copy, modify, merge, or transfer copies of the Program except as provided in this license;

2) reverse assemble or reverse compile the Program; or

3) sublicense, rent, lease, or assign the Program.

2. Limited Warranty

The Programs are provided “AS IS.” THERE ARE NO OTHER WARRANTIES COVERING THE PROGRAMS (OR CONDITIONS), EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Some jurisdictions do not allow the exclusion of implied warranties, so the above exclusion may not apply to you.

SUPPLEMENT TO AGREEMENT FOR SOFTWARE BUNDLING AND DISTRIBUTION FOR ALDC

3. Limitation of Remedies

IBM’s entire liability under this license is the following:

1) For any claim (including fundamental breach), in any form, related in any way to this license, IBM’s liability will be for actual damages only and will be limited to the greater of:

   a) the equivalent of U.S.$25,000 in your local currency; or

   b) IBM's then generally available license fee for the Program

This limitation will not apply to claims for bodily injury or damages to real or tangible personal property for which IBM is legally liable. IBM will not be liable for any lost profits, lost savings, or any incidental damages or other economic consequential damages, even if IBM, or its authorized supplier, has been advised of the possibility of such damages. IBM will not be liable for any damages claimed by you based on any third party claim. This limitation of remedies also applies to any developer of Programs supplied to IBM. IBM’s and the developer’s limitations of remedies are not cumulative. Such developer is an intended beneficiary of this Section. Some jurisdictions do not allow these limitations or exclusions, so they may not apply to you.

4. General

You may terminate your license at any time. IBM may terminate your license if you fail to comply with the terms and conditions of this license. In either event, you must destroy all your copies of the Program. You are responsible for payment of any taxes, including personal property taxes, resulting from this license. Neither party may bring an action, regardless of form, more than two years after the cause of action arose. If you acquired the Program in the United States, this license is governed by the laws of the State of New York. If you acquired the Program in Canada, this license is governed by the laws of the Province of Ontario. Otherwise, this license is governed by the laws of the country in which you acquired the Program.
Agfa Japan License Agreement

1. “Software” shall mean the digitally encoded, machine readable, scalable outline data as encoded in a special format as well as the UFST Software.

2. You agree to accept a non-exclusive license to use the Software to reproduce and display weights, styles and versions of letters, numerals, characters and symbols (“Typefaces”) solely for your own customary business or personal purposes at the address stated on the registration card you return to Agfa Japan. Under the terms of this License Agreement, you have the right to use the Fonts on up to three printers. If you need to have access to the fonts on more than three printers, you need to acquire a multi-user license agreement which can be obtained from Agfa Japan. Agfa Japan retains all rights, title and interest to the Software and Typefaces and no rights are granted to you other than a License to use the Software on the terms expressly set forth in this Agreement.

3. To protect proprietary rights of Agfa Japan, you agree to maintain the Software and other proprietary information concerning the Typefaces in strict confidence and to establish reasonable procedures regulating access to and use of the Software and Typefaces.

4. You agree not to duplicate or copy the Software or Typefaces, except that you may make one backup copy. You agree that any such copy shall contain the same proprietary notices as those appearing on the original.

5. This License shall continue until the last use of the Software and Typefaces, unless sooner terminated. This License may be terminated by Agfa Japan if you fail to comply with the terms of this License and such failure is not remedied within thirty (30) days after notice from Agfa Japan. When this License expires or is terminated, you shall either return to Agfa Japan or destroy all copies of the Software and Typefaces and documentation as requested.

6. You agree that you will not modify, alter, disassemble, decrypt, reverse engineer or decompile the Software.

7. Agfa Japan warrants that for ninety (90) days after delivery, the Software will perform in accordance with Agfa Japan-published specifications, and the diskette will be free from defects in material and workmanship. Agfa Japan does not warrant that the Software is free from all bugs, errors and omissions.

   The parties agree that all other warranties, expressed or implied, including warranties of fitness for a particular purpose and merchantability, are excluded.

8. Your exclusive remedy and the sole liability of Agfa Japan in connection with the Software and Typefaces is repair or replacement of defective parts, upon their return to Agfa Japan. In no event will Agfa Japan be liable for lost profits, lost data, or any other incidental or consequential damages, or any damages caused by abuse or misapplication of the Software and Typefaces.

9. New York, U.S.A. law governs this Agreement.

10. You shall not sublicense, sell, lease, or otherwise transfer the Software and/or Typefaces without the prior written consent of Agfa Japan.

11. Use, duplication or disclosure by the Government is subject to restrictions as set forth in the Rights in Technical Data and Computer Software clause at FAR 252-227-7013, subdivision (b)(3)(ii) or subparagraph (c)(1)(ii), as appropriate. Further use, duplication or disclosure is subject to restrictions applicable to restricted rights software as set forth in FAR 52.227-19 (c)(2).

12. You acknowledge that you have read this Agreement, understand it, and agree to be bound by its terms and conditions. Neither party shall be bound by any statement or representation not contained in this Agreement. No change in this Agreement is effective unless written and signed by properly authorized representatives of each party. By opening this diskette package, you agree to accept the terms and conditions of this Agreement.
1 Names of Parts

Main Body

1 Original cover — Open/close this cover when setting the original on the platen.
2 Output tray — Finished copies or printouts are stored on this tray. The output tray has a storage capacity of 250 sheets of standard paper (80 g/m²).
3 Operation panel — Perform operations from the main body here.
4 Cassette 1 — This cassette has a storage capacity of 300 sheets of standard paper (80 g/m²).
5 Cassette 2 (20 ppm model/25 ppm model only) — This cassette has a storage capacity of 300 sheets of standard paper (80 g/m²).
6 Paper width adjusting tab — Use this tab to adjust the paper width guides to fit to the width of the paper to be loaded in the cassette.
7 Paper length adjusting tab — Adjust this tab to adjust the paper length guide to fit to the length of the paper to be loaded in the cassette.
8 Left cover handle — Pull this handle up to open the left cover.
9 Multi-bypass tray — When using small paper or special paper, set the paper here.
10 Bypass tray extension — Pull this to use when setting A4R paper or larger paper.
11 Slider — Adjust this to fit to the width of paper to be set in the multi-bypass tray.
12 **Platen** — Set an original here for copying. Be sure to lay the original face-down and align the edge of the original flush up against the left rear corner of the platen.

13 **Original size indicator plates** — Be sure to set an original along these plates when setting it on the platen.

14 **Left cover** — Open this cover if a paper jam occurs inside the machine.

15 **Waste toner box**

16 **Toner container release lever** — Operate this lever when replacing the toner container.

17 **Toner container**

18 **Charger cleaner rod** — Pull this rod and then push it back again after replacing the toner container or when images become dirty.

19 **Front cover** — Open this cover when replacing the toner container and the waste toner box or when cleaning this machine.
20 **Main power switch** — Turn this switch on ( | ) before using this machine.

21 **Main power switch cover** — Open to operate the main power switch.

22 **Handles for transport** — Hold the four recessed portions at the right and left when transporting this machine.

23 **Network interface connector** — When connecting this machine to a network, connect a network cable to this connector.

24 **USB interface connector** — When connecting this machine to a computer through USB, connect a USB cable to this connector.

25 **Parallel interface connector** — When connecting this machine to a computer through parallel interface, connect a bi-directional parallel cable to this connector.

26 **Memory card slot** — Insert an optional memory card to this slot.
Names of Parts

Operation Panel

1. **System Menu/Counter key and indicator** — Press this key to set the job accounting function, adjust the default settings or set the machine. (For details, refer to Chapter 3 and Chapter 4 in Advanced Operation Guide.)

2. **Copier key and indicator** — Press this key when using the copier functions of this machine. The Copier indicator will light up when the machine is in the copier mode.

3. **Printer key and indicator** — Press this key when using the printer functions of this machine. The Printer indicator will light up when the machine is in the printer mode.

4. **Scanner key and indicator** — Press this key when using the scanner functions of this machine. The Scanner indicator will light up when the machine is in the scanner mode. For the scanner functions, the optional network scanner kit must be installed.

5. **Fax key and indicator** — Press this key when using the fax functions of this machine. The Fax indicator will light up when the machine is in the fax mode. For the fax functions, the optional fax kit must be installed.

6. **Combine key and indicator** — Press this key to use the combine copy function. The Combine indicator will light up. (See page 3-17.)

7. **Border Erase key and indicator** — Press this key to use the border erase function. The Border Erase indicator will light up. (For details, refer to Chapter 1 in Advanced Operation Guide, Border Erase Mode.)

8. **Duplex/Split Page key and indicator** — Press this key to perform duplex copying or use the split page function. The Duplex/Split Page indicator will light up. For duplex copying, the optional duplex unit must be installed. (See page 3-9 and 3-12.)

9. **Offset key and indicator** — Press this key to perform offset copying. The Offset indicator will light up. (For details, refer to Chapter 1 in Advanced Operation Guide, Offset Copying.)

10. **Function key** — Press this key to set the orientation of the originals or perform continuous scanning copying, auto rotation copying or EcoPrint mode. (For details, refer to Chapter 1 in Advanced Operation Guide.)

11. **Scanner Function key** — Press this key to adjust various scanner settings. For the scanner functions, the optional network scanner kit must be installed.

12. **Auto Selection key and indicator** — Press this key when using the auto selection mode. The Auto Selection indicator will light up. For the auto selection mode, the optional document processor must be installed. (For details, refer to Chapter 1 in Advanced Operation Guide, Auto Selection Mode.)

</table>
| **26 Ready indicator (green)**  
Lit — The machine is ready to print.  
Blinking — An error has occurred. Clear the error referring to *Displayed Messages* on page 6-4.  
Off — The machine is not ready to print. |
| **27 Data indicator (green)**  
Lit — The machine is processing print data.  
Blinking — The machine is receiving print data. |
| **28 Attention indicator (red)**  
Lit — An error has occurred. Clear the error referring to *Displayed Messages* on page 6-4. |
| **29 Job Accounting key** — In the job accounting mode, press this key after copying is complete. The ID-code entry screen will appear. (For details, refer to *Chapter 4 in Advanced Operation Guide*. ) |
| **30 Interrupt key and indicator** — Press this key to use the interrupt mode. The Interrupt indicator will light up. (See page 3-21.) |
| **31 Energy Saver key and indicator** — Press this key to turn the low power mode on. In the low power mode, only the Energy Saver indicator, Power indicator, and main power indicator will light up and the other indicators on the operation panel will go out. Press the same key again to turn the low power mode off. (See page 3-22.) |
| **32 Power key and indicator** — Press this key to turn the sleep mode on. In the sleep mode, only the main power indicator will light up and all other indicators on the operation panel will go out. Press the same key again to turn the sleep mode off. (See page 3-24.) |
| **33 Numeric keys** — Press these keys to set the number of copies or enter a numerical value. |
| **34 Reset key** — Press this key to reset each function and to return the machine to the initial mode†. |
35 **Stop/Clear key** — Press this key to stop copying or to change the number of copies. Also press this key to return to the previous screen from a setting screen for copier functions or the like.

36 **Start key and indicator** — Press this key to start copying. Copying will start immediately if you press this key when the indicator is lit green.

37 **Main power indicator** — Lights up when the main power switch is turned on ( | ).

† Initial mode (the state that the machine enters at the end of warm-up or when the Reset key is pressed)

In the factory default setting, paper of the same size as the original is selected automatically (auto paper selection mode), the copy magnification ratio is set to 100 %, the number of copies to be made is set to 1 and the image quality is set to the **Text + Photo** mode.

**Notes**

- The settings for the initial mode can be changed using the default setting procedure. (For details, refer to Chapter 3 in Advanced Operation Guide, Default Setting Mode.)
- It is possible to change the cassette selected in the initial mode. (For the 16 ppm model, the optional paper feeder must be installed. For details, refer to Chapter 3 in Advanced Operation Guide, Priority Cassette.)
- It is possible to change the image quality mode selected in the initial mode. (For details, refer to Chapter 3 in Advanced Operation Guide, Original Image Quality.)
- It is possible to change the default setting of the exposure to Auto exposure mode. (For details, refer to Chapter 3 in Advanced Operation Guide, Exposure Mode.)

**Auto Clear Function**

Once a designated amount of time has passed after copying stops (between 10 and 270 seconds), the machine will return to the same settings as those after warm-up. Copies can continually be made using the same settings (copy mode, number of copies, and exposure mode) if the next batch of copying is started before the auto clear function is activated.

**Note**

For setting the time that passes before the auto clear function is activated, refer to Chapter 3 in Advanced Operation Guide, Auto Clear Time.

**Automatic Cassette Switching Function**

If multiple cassettes contain the same size paper and the paper in one cassette runs out during copying, the automatic cassette switching function will switch paper feed from the empty cassette to the other cassette that still contains paper.

**Notes**

- To use this function in the 16 ppm model, the optional paper feeder must be installed.
- The automatic cassette switching function can be turned off. (For details, refer to Chapter 3 in Advanced Operation Guide, Auto Cassette Switching.)
- The paper in both cassettes must be set in the same orientation.
Message Display

The message display on this machine indicates the operation status of the machine.

Copier Basic Screen

This screen is displayed when the Copier key is pressed.

  Printer default ▶
```
2 Preparations

Loading Paper

Paper can be loaded into either the cassette or the multi-bypass tray. For details on paper that can be used, refer to Appendix in Advanced Operation Guide, Paper.

Note for Adding Paper

After taking new paper out of its packaging, be sure to fan through the paper a few times to separate the sheets before loading that paper into the cassette or the multi-bypass tray.

Set the paper in the cassette with the side which faced the top of its packaging facing up.

Important!

• When using paper that has been run through a machine before, check it to make sure that all staples and paper clips have been removed. Not doing so may result in poor images or malfunctions.

• Straighten out any creases or curls in the paper before loading it. Failure to straighten out creases and curls may lead to paper jams.

• Leaving paper out of its package under high temperature and high humidity conditions may lead to problems caused by ambient moisture. After loading paper into the cassette, store the remaining paper sealed in the paper storage bag. Also if any paper remains in the multi-bypass tray, store the paper sealed in the paper storage bag. Before leaving the machine in disuse for a prolonged period of time, remove the paper from the cassette and seal it in the paper storage bag to protect it from moisture.
Loading Paper into the Cassette

Standard paper, recycled paper, and colored paper can be loaded into the cassette. Up to 300 sheets of standard paper (80 g/m²) or 100 sheets of thick paper (90 to 105 g/m²) can be set.

Paper sizes that can be loaded are: A3, B4, A4, A4R, B5, B5R, A5R, Folio, 11 × 17" (Ledger), 8 1/2 × 14" (Legal), 11 × 8 1/2", 8 1/2 × 11" (Letter), 5 1/2 × 8 1/2" (Statement), 8 1/2 × 13" (Oficio II), 8K, and 16K.

Important! Specify the type of paper that is loaded into the cassette (standard, recycled, etc.). For the method of setting, refer to Chapter 3 in Advanced Operation Guide, Paper Type (cassettes 1 to 4).

1. Pull the cassette out toward you as far as it will go.

   ![Pulling Cassette Out](image)

   **Note** Do not pull more than one cassette out at a time.

2. Push down on the cassette base plate and secure it.

   ![Pushing Cassette Base Plate](image)

3. Grasp the paper width adjusting tab and adjust the width guides to the paper size.

   ![Adjusting Paper Width](image)

   **Important!** Make sure that the width guides are flush against the paper. If there is space between the guides and the paper, set the width guides again.

   **Note** The paper sizes are impressed in the cassette.
4 Grasp the paper length adjusting tab and adjust the length guide to the paper size.

**Important!**
- Make sure that the length guide is flush against the paper. If there is space between the guide and the paper, set the length guide again.
- When setting 11 × 17” (Ledger) paper, move the paper length guide to the right end and push it down as shown in the illustration.

**Note** The paper sizes are impressed in the cassette.

5 Set the paper straight from the upper part.

**Important!**
- Be careful not to bend or crease the paper when inserting it into the cassette. Creases in the paper may lead to paper jams.
- The maximum paper limit indicator A is provided on a paper width guide. Make sure that the paper loaded is below the maximum paper limit indicator.
- When loading paper into the cassette, set it with the side which faced the top of its packaging facing up.
- Be sure to adjust the width and length guides to the paper size before loading the paper. Failure to do so may result in paper skewing or jamming.
- If the length and width guides are not flush against the paper, a size that is different from the actual size may be displayed on the message display.
- When the paper has become wrinkled from moisture and cannot be fed, set the paper so that the wrinkled side is toward the length guide.

**Note** When loading paper into the cassette, set it with the side to be printed facing up.
Preparations

6 Set the accompanying paper sheet so that the paper size set in the cassette can be identified from the front of the cassette.

7 Gently push in the cassette.

Important! When the machine will not be used for a long period of time, remove the paper from the cassette, put it in a storage bag, and seal the bag in order to protect the paper from moisture.

Setting Paper in the Multi-Bypass Tray

In addition to standard paper and recycled paper, special paper (45 to 160 g/m²) can also be set. Up to 50 sheets of standard (80 g/m²) paper (25 sheets of A3, B4, Folio, 11 × 17" (Ledger), 8 1/2 × 14" (Legal), 8 1/2 × 13" (Oficio II), or 8K) can be set. The paper sizes that can be used are: A3 to A6R, postcard, Folio, 11 × 17" (Ledger) to 5 1/2 × 8 1/2" (Statement), 8K and 16K.

Be sure to set special paper in the multi-bypass tray.

The types of special paper and their respective number of sheets that can be loaded are shown below.

- Color paper: 50 sheets
- Postcard: 10 sheets
- Thin paper/thick paper (45 to 160 g/m²): 50 sheets to 5 sheets (the number of sheets differs depending on paper size and thickness)

Important! When using the multi-bypass tray, set the paper size and type referring to Multi-Bypass Tray Settings on page 2-6.

- You can set the multi-bypass tray so that when you select the multi-bypass tray, the Bypass Paper size screen is displayed. For the method of setting, refer to Chapter 3 in Advanced Operation Guide, Multi-Bypass Tray Confirmation Display.

1 Open the multi-bypass tray.
Note: When setting paper greater than A4R/8 1/2 × 11” (Letter), pull out the bypass tray extension to match the paper size.

2 Adjust the sliders to the width of the paper to be set.

3 Set the paper along the sliders and put it in until it stops.

Important!
- Always straighten out postcards and other types of thick paper that are curled before using them. The paper may not be fed depending on the paper quality.
- When loading paper into the multi-bypass tray, set it with the side which faced the top of its packaging facing down. If the front end of the paper is curled, straighten it out before setting it.
- Make sure there are no creases, etc. in the paper. Creases in the paper may lead to paper jams.
- Make sure that the slider is flush against the edge of paper. If not, adjust the slider until it is flush with the edge of paper.

Note: When loading paper into the multi-bypass tray, set it with the side to be printed facing down.
Multi-Bypass Tray Settings

Set the following items for feeding paper from the multi-bypass tray.

**Paper Size**

Set the size of paper to be used from the multi-bypass tray. You can use irregular size paper by inputting the size.

**Note** If the paper size is unknown or no particular paper size setting is required, select Universal Size.

**Selecting a Size from Regular Sizes**

Sizes that can be set:

- Inch Specification — 11 × 17” (Ledger), 8 1/2 × 14” (Legal), 8 1/2 × 13” (Oficio II), 8 1/2 × 11” (Letter), 11 × 8 1/2”, 5 1/2 × 8 1/2” (Statement), A4R, A4

1. Press the **System Menu/Counter** key.

2. Press the ▲ key or the ▼ key to select **Bypass setting**.

3. Press the **Enter** key.

4. Press the ▲ key or the ▼ key to select the paper size.
Preparations

5 Press the **Enter** key. The **Bypass Paper type** screen is displayed. Proceed to **Paper Type** described below.

Selecting a Size from Other Regular Sizes

Sizes that can be set:

Metric Specification — 11 × 17” (Ledger), 8 1/2 × 14” (Legal), 8 1/2 × 13” (Oficio II), 5 1/2 × 8 1/2” (Statement), HAGAKI, Executive, ISO B5, Envelope DL, Envelope C5, Envelope C4, Comm. #10, Comm. #9, Comm. #6-3/4, Monarch, OufukuHagaki, YOUKEI 2, YOUKEI 4, 8K, 16KR, 16K

1 Press the **System Menu/Counter** key.

2 Press the ▲ key or the ▼ key to select **Bypass setting**.

3 Press the **Enter** key.

4 Press the ▲ key or the ▼ key to select **Other Regular Size**.
Preparations

5 Press the Enter key.

6 Press the ▲ key or the ▼ key to select the paper size.

7 Press the Enter key. The Bypass Paper type screen is displayed. Proceed to Paper Type described below.

Inputting a Paper Size

1 Press the System Menu/Counter key.

2 Press the ▲ key or the ▼ key to select Bypass setting.

3 Press the Enter key.
4 Press the ▲ key or the ▼ key to select **Input Size**.

5 Press the **Enter** key.

6 Press the < key or the > key to set the vertical size. You can set the vertical size to 3 7/8" to 11 5/8" in 1/8" increments [98 to 297 mm in 1 mm increments].

7 Press the ▼ key to select the horizontal size.

8 Press the < key or the > key to set the horizontal size. You can set the horizontal size to 5 7/8" to 17" in 1/8" increments [148 to 432 mm in 1 mm increments].

9 Press the **Enter** key. The **Bypass Paper type** screen is displayed. Proceed to **Paper Type** described below.
Preparations

Paper Type

To set the paper type to be used in the multi-bypass tray, continue the procedure from Paper Size setting.

Paper types that can be set: Plain, Transparency, Preprinted, Labels, Bond, Recycled, Vellum, Rough, Letterhead, Color [Colour], Prepunched, Envelope, Cardstock, Thick paper, High quality, Custom 1 (to 8)

1. Press the ▲ key or the ▼ key to select the paper type.

2. Press the Enter key. The message display returns to the copier basic screen.
Connecting the Cables

This machine can be connected either to a network or directly to a single computer. This section describes the procedures to make both types of connection.

Connecting the Network Cable

To connect this machine to a network, use an Ethernet cable (10Base-T or 100Base-TX).

1. Open the main power switch cover located on the right side of the machine, turn the main power switch off (O), and remove the power cord from the outlet.

2. Connect the network cable to the network interface connector at the right side of the machine.

3. Connect the other end of the network cable to your network device (hub).

4. Make network settings. (See page 2-15.)

Connecting the Printer Cable

To connect the machine directly to your computer, use either a parallel cable or a USB cable.

Important! Be sure to turn the main power switch of this machine off before connecting the printer cable.

1. Open the main power switch cover located on the right side of the machine, turn the main power switch off (O), and remove the power cord from the outlet. Turn the power of your computer off.
2 Connect the printer cable to the parallel interface connector or the USB interface connector located at the right side of the machine.

Notes

- Use the USB cable that complies with Revision 2.0 of the USB standard. (a rectangular Type A plug and a square Type B plug).
- The USB cable should be shielded and not be longer than 5 meters (16 feet).

3 Connect the other end of the printer cable to the parallel interface connector or a USB interface connector on your computer.
Preparations

Connecting the Power Cord

Connect the power cord to this machine.

1. Connect the power cord to the power cord connector located at the right side of the machine.

2. Connect the other end of the power cord to a power outlet.
Turning the Power On

Turn the power of this machine on.

1. Open the main power switch cover located on the right side of the machine and turn the main power switch on ( ). The machine starts to warm up.

2. Once warm-up is completed, the Start indicator lights up green.
Network (TCP/IP) Settings

Register the IP address of this machine.

**Notes**
- The IP address that should be registered here differs depending upon your network environment. Check with your network administrator before performing this setting.
- If you use the following procedure to manually register the IP address, be sure to turn the DHCP setting off and the TCP/IP setting on. (For details, refer to Chapter 2 in Advanced Operation Guide, Network Setting.)

1. Press the **Printer** key.

2. Press the ▲ key or the ▼ key to select **MENU**.

3. Press the **Enter** key.

4. Press the ▲ key or the ▼ key to select **Interface**.

5. Press the **Enter** key.

6. Press the ▲ key or the ▼ key to select **Network**.
7  Press the **Enter** key.

8  Press the ▲ key or the ▼ key to select TCP/IP.

9  Press the **Enter** key.

10 Press the ▲ key or the ▼ key to select Change #.

11 Press the **Enter** key.

12 Press the ▲ key or the ▼ key to select IP Address.

13 Press the **Enter** key.
14 Use the numeric keys to input the IP address. Enter the first block of 3 digits of the address in the highlighted area.

<table>
<thead>
<tr>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>0. 0. 0. 0</td>
</tr>
</tbody>
</table>

15 Press the # key.

16 Enter the next block of 3 digits of the address in the highlighted area.

<table>
<thead>
<tr>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>10. 0. 0. 0</td>
</tr>
</tbody>
</table>

17 Continue the same procedure for the other 2 blocks.

18 Press the Enter key.

Next, set the subnet mask.

Registration of Subnet Mask

To register the subnet mask, continue the procedure from step 18 above.

1 Press the ▲ key or the ▼ key to select Subnet Mask.

<table>
<thead>
<tr>
<th>TCP/IP Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHCP</td>
</tr>
<tr>
<td>IP Address</td>
</tr>
<tr>
<td>Subnet Mask</td>
</tr>
</tbody>
</table>

2 Press the Enter key.

3 Use the same procedure as steps 14 to 17 of IP address setting to input the address.

<table>
<thead>
<tr>
<th>Subnet Mask</th>
</tr>
</thead>
<tbody>
<tr>
<td>0. 0. 0. 0</td>
</tr>
</tbody>
</table>
Registering the Default Gateway

To register the default gateway, continue the procedure from step 4 above.

1. Press the ▲ key or the ▼ key to select Gateway.

2. Press the Enter key.

3. Use the same procedure as steps 14 to 17 of IP address setting to input the address.

4. Press the Enter key.

5. When you finish making all of the network setting, press the Reset key. The message display returns to the printer basic screen.

---

4. Press the Enter key.

Next, set the default gateway.
Setting the Date and Time

Set the current date and time, time difference from the Greenwich Mean Time (GMT), and summer time.

1. Press the System Menu/Counter key.

2. Press the ▲ key or the ▼ key to select Machine default.

3. Press the Enter key.

4. Use the numeric keys to input the four-digit management code. The management code at the factory default setting is 1600 for the 16 ppm model, 2000 for the 20 ppm model, and 2500 for the 25 ppm model.

Note: The four-digit management code can be changed. (For details, refer to Chapter 3 in Advanced Operation Guide, Administrator Management Code Change.)

5. If the management code is accepted, the Machine default screen is displayed.

6. Press the ▲ key or the ▼ key to select Date/Time.
7 Press the Enter key.

Setting the Time Difference

8 Press the ▲ key or the ▼ key to select Time Zone.

9 Press the < key or the > key to set the time difference. Next, set the time.

Setting the Time

10 Press the ▲ key or the ▼ key to select Time.

11 Press the < key or the > key to set the current time. Next, set the summer time.

Setting the Summer Time

12 Press the ▲ key or the ▼ key to select DST [Summertime].
13 Press the < key or the > key to select On or Off. 
Next, set the date.

Setting the Date

14 Press the ▲ key or the ▼ key to select Year.

15 Press the < key or the > key to set the current year.

16 Press the ▲ key or the ▼ key to select Month.

17 Press the < key or the > key to set the current month.

18 Press the ▲ key or the ▼ key to select Day.
19 Press the < key or the > key to set the current day.

20 After all the setting is complete, press the ▲ key or the ▼ key to select End.

21 Press the Enter key.

22 Press the Reset key. The message display returns to the copier basic screen.
Language Setting

You can select the language to be used on the message display.

The following languages are available for selection:

Inch Specification — English, French (Français), Spanish (Español), and Japanese (日本語)

Metric Specification — English, German (Deutsch), French (Français), Spanish (Español), and Italian (Italiano)

For details, refer to Chapter 3 in Advanced Operation Guide, Language Setting.

Other Settings

Various default settings can be adjusted to your preference in this machine. For details on the setting items and the setting method, refer to Chapter 3 in Advanced Operation Guide, Default Setting Mode.
3 Basic Operation

This chapter explains the following operations. For other functions, refer to the Advanced Operation Guide.

- Basic Copying Procedure
- Zoom Copying
- Duplex Copying
- Split Copying
- Sort Copying
- Combine Copying
- Interrupt Mode
- Low Power Mode
- Sleep Mode
- Basic Printing Procedure

Basic Copying Procedure

1. Open the main power switch cover located on the right side of the machine and turn the main power switch on (↑). At the end of warm-up, the Start indicator lights up green.

2. Set the original onto the platen. Be sure to set the original by aligning it with the left rear corner of the platen along the original size indicator plates.

Note: For the method of setting originals in the optional document processor, see Setting Originals in the Document Processor on page 4-2.
3 Select the desired copier’s functions to use.

4 Select the copy paper. If Auto is displayed on the message display, copy paper of the same size as the original is automatically selected.

To change the paper size, press the Paper Select key to select the desired paper source.

Notes
• It is possible to disable this auto paper selection function. (For details, refer to Chapter 3 in Advanced Operation Guide, Paper Selection.)
• It is also possible to specify a cassette that will be selected automatically even without setting any originals. (For details, refer to Chapter 3 in Advanced Operation Guide, Priority Cassette.)

5 Press the image quality mode select key to light up the desired image quality mode indicator.

Image quality mode | Description
--- | ---
Text + Photo | Select to copy originals that contain a mixture of both text and photographs.
Text | Select to copy originals that contain large amounts of text, such as documents, etc.
Photo | Select to copy originals that contain photographs.

Notes
• It is possible to adjust the copy exposure in each of the image quality modes. (For details, refer to Chapter 3 in Advanced Operation Guide, Exposure Adjustment for Text + Photo Originals, Exposure Adjustment for Text Originals, and Exposure Adjustment for Photo Originals.)
• It is also possible to change the default image quality mode to be selected in the initial mode. (For details, refer to Chapter 3 in Advanced Operation Guide, Original Image Quality.)
6 Adjust the exposure. You can adjust the exposure either manually (manual exposure mode) or automatically (auto exposure mode) with automatic detection of the contrast of the original. (For details, refer to Chapter 1 in Advanced Operation Guide, Copy Exposure Adjustment.)

7 Press the numeric keys to set the desired number of copies. Up to 999 can be set.

8 Press the Start key. When the Start indicator is lit green, copying can be performed.

9 Finished copies are output onto the output tray.

**Note**  The capacity of the output tray is 250 sheets of standard paper (80 g/m²). The capacity, however, varies with the condition of the paper to be used.
If the optional fax kit is not installed:

⚠️ **Caution**

If the machine will not be used for a short period of time (overnight, etc.), turn the main power switch off (○). If it will not be used for an extended period of time (vacations, etc.), remove the power plug from the outlet for safety purposes during the time the machine is not in use.

If the optional fax kit is installed:

When the main power switch is turned off or the power plug is removed from the outlet, fax transmission and reception cannot be performed.
Zoom Copying

The zoom ratio can be changed to reduce or enlarge the copies. The following modes are available for zoom copying.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto zoom ratio selection mode</td>
<td>Original images are reduced or enlarged according to the selected paper size.</td>
</tr>
<tr>
<td>Zoom mode</td>
<td>The zoom ratio can be changed from 25% to 200% in 1% increments.</td>
</tr>
<tr>
<td>Preset zoom mode</td>
<td>A preset zoom ratio can be used to reduce or enlarge original images.</td>
</tr>
</tbody>
</table>

Inch Specification

200 % (5.5 x 8.5 → 11 x 17), 154 % (5.5 x 8.5 → 8.5 x 14), 129 % (8.5 x 11 → 11 x 17), 121 % (8.5 x 14 → 11 x 17), 78 % (8.5 x 14 → 8.5 x 11), 77 % (11 x 17 → 8.5 x 14), 64 % (11 x 17 → 8.5 x 11), 50 % (11 x 17 → 5.5 x 8.5)

Metric Specification

200 % (A5 → A3), 141 % (A4 → A3, A5→A4), 127 % (Folio → A3), 106 % (11 x 15" → A3), 90 % (Folio → A4), 75 % (11 x 15" → A4), 70 % (A3 → A4, A4 → A5), 50 %

Metric Specification (Asia Pacific)

200 % (A5 → A3), 141 % (A4 → A3, B5 → B4), 122 % (A4 → B4, A5 → B5), 115 % (B4 → A3, B5 → A4), 86 % (A3 → B4, A4 → B5), 81 % (B4 → A4, B5 → A5), 70 % (A3 → A4, B4 → B5), 50 %

Auto Zoom Ratio Selection Mode

Original images are reduced or enlarged according to the selected paper size.

![Auto Zoom Ratio Selection Mode Image]

8 1/2 x 11" A4: 11 x 17": 129 % A3: 141 %

A4: 8 1/2 x 11": 64 % A5: 70 %

Note

You can set a default setting so that the auto zoom ratio selection mode is selected when you select a cassette. (For details, refer to Chapter 3 in Advanced Operation Guide, Default Magnification.)

1 Set the original.
2 Press the **Auto%/100%** key. **Auto %** is displayed on the message display.

3 Press the **Paper Select** key to select the copy paper. The zoom ratio is displayed on the message display.

4 Press the **Start** key. Copying starts.

**Zoom Mode**

With this mode, the zoom ratio can be set between 25 % and 200 % in 1 % increments.

1 Set the original.
2 Press the **Zoom** key.

3 Use the numeric keys to input the zoom ratio. The zoom ratio is displayed on the message display.
   (The display example shows a screen displayed when an operator enters 1, 1, and 8.)

4 Press the **Enter** key.

5 Press the **Start** key. Copying starts.
Preset Zoom Mode

With this mode, the zoom ratio can be set to one of the preset ratios.

1. Set the original.

2. Press the Zoom key.

3. Press the ▲ key or the ▼ key to select the desired zoom ratio.

4. Press the Enter key. The zoom ratio is displayed on the message display.

5. Press the Start key. Copying starts.
Basic Operation

Duplex Copying

Two-sided copies can be made from a variety of originals including double-page spread or two-sided originals.

Note: The optional duplex unit must be installed.

The following modes are available for duplex copying.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 sided-&gt;2 sided</td>
<td>One-sided originals are copied onto the front and back sides of the copy paper. If the number of originals is odd, the back side of the copying from 1-sided originals) last copy page is blank.</td>
</tr>
</tbody>
</table>

Note

In the 1-sided to 2-sided mode, select the following setting.

- Binding at left/right of originals → Binding at left of copies: The images for the back side are copied without rotation...
- Binding at left/right of originals → Binding at top of copies: The images for the back side are rotated 180 degrees and copied. Finished copies can be bound at the top so that double-page spread pages are copied in the same orientation...
Set the original.

Press the Duplex/Split Page key.

Press the ▲ key or the ▼ key to select the desired duplex copy mode from 1 sided→2 sided [1-sided→2-sided], 2 sided→2 sided [2-sided→2-sided], and Book→2-sided.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 sided→2 sided [2-sided→2-sided] (2-sided copying from 2-sided originals)</td>
<td>Front and back sides of originals are copied in the same way onto both sides of copy paper.</td>
</tr>
<tr>
<td>Book→2-sided (2-sided copying from double-page spread originals)</td>
<td>A double-page spread original of magazines, books, etc. can be copied onto both sides of copy paper by pressing the Start key one time.</td>
</tr>
</tbody>
</table>

**Note**

The paper sizes that can be used are A3 to A5R, Folio, 11 × 17” (Ledger), 8 1/2 × 14” (Legal), 8 1/2 × 11” (Letter), 11 × 8 1/2”, 5 1/2 × 8 1/2” (Statement), 8 1/2 × 13” (Oficio II), 8K, 16K, and 16KR.

The original sizes that can be used are A3, B4, A4R, B5R, A5R, 11 × 17” (Ledger), 8 1/2 × 11” (Letter), and 8K. The paper sizes are limited to 11 × 8 1/2” and 16K in the inch specifications and A4, B5, and 16K in the metric specifications. The paper size can be changed and the zoom ratio adjusted to fit the size of the paper.
4  Press the **Enter** key.
   If you have selected 1 sided->2 sided [1-sided->2-sided], proceed to the next step.
   If you have selected 2 sided->2 sided [2-sided->2-sided] or Book->2-sided, proceed to step 7.

5  Press the ▲ key or the ▼ key to select the desired finished stitch side.

6  Press the **Enter** key.

7  Press the **Start** key. Scanning of the original starts.
   If the originals have been set in the optional document processor, copying starts automatically.
   If the original has been set on the platen, a message prompting replacement of the original is displayed. In this case, proceed to the next step.

8  Replace the original and press the **Start** key. Scanning of the original starts.

9  If no original remains, press the **Enter** key. Copying starts.
Basic Operation

Split Copying

Each page of double-page spread or two-sided originals is copied separately.

The following modes are available for split copying.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 sided-&gt;1 sided</td>
<td>Each page of 2-sided originals is copied separately.</td>
</tr>
<tr>
<td>[2-sided-&gt;1-sided] (Split copying from double-page spread originals)</td>
<td></td>
</tr>
</tbody>
</table>

Book->1-sided (Split copying from 2-sided originals) etc. is copied separately.

Note

The original sizes that can be used are A3, B4, A4R, B5R, A5R, 11 × 17” (Ledger), 8 ½ × 11” (Letter), and 8K. The paper sizes are limited to 11 × 8 ½” and 16K in the inch specifications and A4, B5, and 16K in the metric specifications. The paper size can be changed and the zoom ratio adjusted to fit the size of the paper.

1 Set the original.
2 Press the **Duplex/Split Page** key.

3 Press the ▲ key or the ▼ key to select the desired split copy mode from 2 sided->1 sided [2-sided->1-sided] and Book->1-sided.

4 Press the **Enter** key.
   - If you have selected 2 sided->1 sided [2-sided->1-sided], proceed to the next step.
   - If you have selected Book->1-sided, proceed to step 7.

5 Press the ▲ key or the ▼ key to select the original stitch side.

6 Press the **Enter** key.

7 Press the **Start** key. Scanning of the original starts.
   - If the originals have been set in the optional document processor, copying starts automatically.
   - If the original has been set on the platen, a message prompting replacement of the original is displayed. In this case, proceed to the next step.

8 Replace the original and press the **Start** key. Scanning of the original starts.
9 If no original remains, press the Enter key. Copying starts.
Sort Copying

Since copying in this mode is performed after multiple originals are scanned and memorized, a required number of collated copy sets can be produced.

Note

If the optional document processor is installed, you can select whether or not to turn on the sort mode at a default setting. (Refer to Chapter 3 in Advanced Operation Guide, Sort Copying.)

1. Set the original.

2. Press the Sort key.

3. Input the number of copies and press the Start key. Scanning of the original starts.

   If the originals have been set in the optional document processor, copying starts automatically.

   If the original has been set on the platen, a message prompting replacement of the original is displayed. In this case, proceed to the next step.

4. Replace the original and press the Start key. Scanning of the original starts.
5 If no original remains, press the **Enter** key. Copying starts.
Combine Copying

Two or four originals can be reduced and copied onto a single sheet. Also borderlines of each original can be marked with solid lines or dotted lines.

Note
Both the original size and the copy paper size must be regular sizes.

The following modes are available for combine copying.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 in 1 [2-UP]</td>
<td>Use this mode to copy two originals onto one sheet. This mode can also be used in conjunction with the duplex copying in order to copy four originals onto both sides of one sheet.</td>
</tr>
<tr>
<td>4 in 1 [4-UP]</td>
<td>Use this mode to copy four originals onto one sheet. This mode can also be used in conjunction with duplex copying in order to copy eight originals onto both sides of one sheet.</td>
</tr>
</tbody>
</table>

Mode Description

- 2 in 1 [2-UP]: Use this mode to copy two originals onto one sheet. This mode can also be used in conjunction with the duplex copying in order to copy four originals onto both sides of one sheet.
- 4 in 1 [4-UP] (horizontal arrangement): Use this mode to copy four originals onto one sheet. This mode can also be used in conjunction with duplex copying in order to copy eight originals onto both sides of one sheet.
2 in 1

The orientations of the originals and the finished copy are shown below.

When the originals are set on the platen:

![Diagram showing 2 in 1 setup on platen]

When the originals are set in the document processor:

![Diagram showing 2 in 1 setup in document processor]

**Note** For the method of setting the 2 in 1 function, refer to Chapter 1 in Advanced Operation Guide, Combine Copying.
4 in 1 (horizontal arrangement)

The orientations of the originals and the finished copy are shown below.

When the originals are set on the platen:

Note: For the method of setting the 4 in 1 (horizontal arrangement) function, refer to Chapter 1 in Advanced Operation Guide, Combine Copying.
4 in 1 (vertical arrangement)

The orientations of the originals and the finished copy are shown below.

When the originals are set on the platen:

![Diagram showing copy orientation for platen setting]

When the originals are set in the document processor:

![Diagram showing copy orientation for document processor setting]

**Note** For the method of setting the 4 in 1 (vertical arrangement) function, refer to *Chapter 1 in Advanced Operation Guide, Combine Copying.*
Interrupt Mode

The interrupt mode can be used to stop output of copying or another job temporarily and to output urgent copy or print data or received fax data. After the interrupt processing is complete, the interrupted job can be resumed.

The following modes are available for the interrupt function.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
</table>
| Interrupt copy | • This mode can be used to stop copying and to make a copy of a different original at different settings. After the interrupt copy has been produced, the interrupted copying can be resumed at the same settings in effect prior to the interruption.  
• This mode can also be used to stop output of a job and to make a copy of another job. After the interrupt copy has been produced, the interrupted job is resumed. |
| Priority output| This mode can be used to interrupt output of a job and to output print data or received fax data with priority. After priority output is complete, the interrupted job is resumed. |

**Note**
To use the fax functions, the optional fax kit must be installed.

During a Copy Job

1. Press the **Interrupt** key. **Interrupt mode OK** [Interrupt mode] is displayed.

2. Store the originals for the current copying.

3. Set the original for interrupt copying and perform copying.

4. After the interrupt copying is complete, press the **Interrupt** key. The settings for the interrupted job are restored.

5. Replace the original with the originals that have been stored. Press the **Start** key to resume copying.
During Output

1. Press the Interrupt key during output. Select Interrupt mode is displayed.

Note: If the machine has neither print data nor received fax data, Interrupt mode OK [Interrupt mode] is displayed. Proceed to step 4.

2. Press the ▲ key or the ▼ key to select the desired interrupt mode.

Notes:
- Priority: Printer is displayed when the machine has print data.
- Priority: Fax is displayed when the machine has received fax data.

3. Press the Enter key.

   If you have selected Interrupt copy, Interrupt mode OK [Interrupt mode] is displayed. Proceed to the next step.

   If you have selected Priority: Printer or Priority: Fax, output of data starts. Proceed to step 5.

4. Set the original for interrupt copying and perform copying.

5. After the interrupt job is complete, press the Interrupt key. The interrupted job resumes.
Low Power Mode

Pressing the **Energy Saver** key puts the machine into a resting state (low power mode) even when the main power switch is on. Only the **Energy Saver** indicator, **Power** indicator, and main power indicator will light up and the other indicators will go out on the operation panel.

Press the **Energy Saver** key again to resume copying operations. The recovery time before copies can be made is 10 seconds.

**Note**

If the machine detects print data or received fax data in the low power mode, the machine will automatically recover and output of data will start.

This machine is equipped with the auto low power function that automatically puts this machine into the lower power mode if no operation has been performed on the machine for a preset period of time. The factory default setting time is 9 minutes.

Time that can be set:

Inch Specification — 1 to 240 minutes (in 1 minute increments)

Metric Specification — 1 to 120 minutes (in 1 minute increments)

**Note**

To change the time that elapses until the auto low power function is activated, refer to **Chapter 3** in *Advanced Operation Guide, Auto Low Power Time.*
Sleep Mode

Pressing the **Power** key puts the machine into a resting state (sleep mode) even when the main power switch is on. Only the main power indicator lights up and all other indicators are turned off on the operation panel. Consumed power in this mode is still less than in the low power mode.

Press the **Power** key again to resume copying operations. The recovery time before copies can be made is 20 seconds.

**Note**
If the machine detects print data or received fax data in the sleep mode, the machine will automatically recover and output of data will start.

This machine is equipped with the auto sleep function that automatically puts this machine into the sleep mode if no operation has been performed on the machine for a preset period of time. The factory default setting time is 19 minutes.

Time that can be set:
- Inch Specification — 1 to 240 minutes (in 1 minute increments)
- Metric Specification — 1 to 120 minutes (in 1 minute increments)

Copiers and printers are generally in a standby mode more than they are in actual operation, so power consumption in the standby mode occupies a large part of overall consumption. Automatically putting the machine in a resting state reduces unnecessary power consumption in the standby mode, resulting in a lower electricity bill.

**Note**
To change the time that elapses until the auto sleep function is activated, refer to **Chapter 3** in *Advanced Operation Guide, Auto Sleep Time*. 
Basic Printing Procedure

Make sure that the machine’s printer or network cable and the power cord are properly connected before using this machine as a printer.

Installing the Printer Driver

For information on how to install the printer driver software, refer to the *KX Printer Driver Operation Guide*.

Printing from Application Software

The steps required to print a document created with an application are explained below. Here, you will execute printing from Microsoft Word as an example.

1. Load paper to be used into the cassette of the machine.
2. From the application’s File menu, select Print. The Print dialog box is displayed.
3. From the drop-down list of Name, select the printer to use.
4. Input the number of copies to print in the Number of copies combo box. Up to 999 copies can be specified.
   For Microsoft Word, we recommend that you click the Options button and specify Use printer settings from the Default tray drop-down list.
5. To start printing, click the OK button.

**Note** For details on the printer driver software, refer to the *KX Printer Driver Operation Guide*.
4 Optional Equipment

The following options are available for this machine.
- Document Processor
- Paper Feeder
- Duplex Unit
- Finisher
- Job Separator
- Key Counter
- Fax Kit
- Network Scanner Kit
- Memory Card (CompactFlash)
- Hard Disk
- Additional Memory

Document Processor

This equipment automatically feeds and scans multiple-sheet originals one by one. Two-sided originals are automatically turned over so that both sides can be scanned.

Acceptable Originals

- Sheet originals only
- Paper weight
  - One-sided originals: 45 g/m² to 160 g/m²
  - Two-sided originals: 50 g/m² to 120 g/m²
- Sizes: A3 to A5R, Folio, 11 × 17" (Ledger) to 5 1/2 × 8 1/2" (Statement)
- Number of originals: 50 sheets (50 g/m² to 80 g/m²)
  (30 sheets for auto selection mode)
Optional Equipment

Notes on Use

Be sure not to use the following as originals in the document processor. In addition, originals with punched holes or perforations should be set so that the edge of the paper with the holes or perforations is facing away from the direction of insertion into the document processor.

- Transparencies
- Carbon paper, crumpled originals or originals with strong folds, and soft originals such as vinyl
- Originals which are not rectangular, wet originals, and originals with adhesive tape or glue
- Originals with clips or staples (To use such originals, remove the clips or staples and straighten any crumpled folds before using them.)
- Clippings or originals with very slippery surfaces
- Originals with wet correction fluid
- Originals with folds (If you must use such originals, smooth out the folded portions before setting them in the document processor.)
- curled originals (If you must use such originals, smooth out the curled portions before setting them in the document processor.)

**Important!** When moving this machine, be sure to close the document processor.

Names of Parts

1. **Original table** — Set originals to be copied on this table.
2. **Original insert guides** — Adjust these guides to the width of the originals to be copied.
3. **Left cover** — Open this cover if an original jam occurs.
4. **Original eject table** — Originals that have been copied are ejected and stored here.
5. **Ejection extension** — Open this extension when using large originals such as A3, B4, 11 \( \times \) 17" (Ledger), and 8 1/2 \( \times \) 14" (Legal).
6. **Document processor release grip** — Hold this grip to open or close the document processor.
7. **Ejection tray** — In the case of two-sided originals, the originals will be temporarily ejected here.

Setting Originals in the Document Processor

1. Adjust the original insert guides to the width of original to be copied.
Notes

- Before setting originals, make sure that there are no originals remaining on the original eject table. Originals left on the eject table may cause other originals to jam.

- When setting multiple originals at one time, be sure to use originals of the same size. It is possible, however, to use different size originals of the same width (for example, 11 × 17” (Ledger) and 11 × 8 1/2” or A4 and A3 at the same time in the auto selection mode. (Refer to Chapter 1 in Advanced Operation Guide, Auto Selection Mode.)

2 Arrange the originals in order and set them face up (front side up for 2-sided originals) on the original table.

Important!

- Be sure to set only a number of originals that does not exceed the level indicator located inside the rear original insert guide. If you set originals exceeding the specified number, the originals may jam. (For the number of originals that can be set, see page 4-1.)

- To keep ejected originals from falling off the machine, open the ejection extension when using large originals such as A3, B4, 11 × 17” (Ledger), and 8 1/2 × 14” (Legal).

- When copying from 2-sided originals, the originals are temporarily ejected onto the ejection tray in order to turn them over. Do not touch them at this point. Any attempt to remove them may cause the originals to jam.
Optional Equipment

Setting Originals on the Platen

When copying from an original which cannot be set in the document processor, open the document processor and set the original directly on the platen.

Notes

• Before opening the document processor, make sure that there are no originals remaining on the original table or on the original eject table. If there are originals left in either place, they may fall off the machine when the document processor is opened.

• When double-page spread originals such as books are copied, shadows may appear along the edges and at the middle of copies.

• Do not put undue pressure on the platen when closing the document processor. The platen glass may be broken.

Caution

Do not leave the document processor open as there is a danger of personal injury.
Optional Equipment

Paper Feeder

In addition to the cassette(s) provided with the main body, a paper feeder (with cassettes that can hold 300 sheets each) can be used.

- The number of sheets that can be accommodated: 300 sheets (standard paper, 64 to 105 g/m²).
- Paper sizes that can be set are: A3, B4, A4, A4R, B5, B5R, A5R, Folio, 11 × 17” (Ledger), 8 1/2 × 14” (Legal), 11 × 8 1/2”, 8 1/2 × 11” (Letter), 5 1/2 × 8 1/2” (Statement), 8 1/2 × 13” (Oficio II), 8K, and 16K

Copy paper can be set in the same way as the standard cassette provided with the main body. (See page 2-1.)

The left covers are provided to allow paper to be removed when a paper jam occurs.

Important!

When lifting and transporting this machine, be sure to detach the paper feeder in advance.

Note

Up to three cassettes can be added for the 16 ppm model, and up to two cassettes can be added for the 20 ppm model and the 25 ppm model.

Duplex Unit

Two-sided copies can be made if the duplex unit is installed. Two-sided copies of sizes from A3 to A5R, Folio, 11 × 17” (Ledger) to 5 1/2 × 8 1/2” (Statement), 8K, 16K, (64 to 80 g/m²) can be made.
Optional Equipment

**Finisher**

The finisher stores a large quantity of copies and can sort multiple copy sets by shifting the position of ejection for each one. It can also staple collated copy sets.

The number of sheets that can be stored in the finisher and the specifications of stapling are shown below.

<table>
<thead>
<tr>
<th>Tray capacity and paper sizes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-stapling</td>
</tr>
<tr>
<td>500 sheets (A4, 11 × 8 1/2&quot;, B5)</td>
</tr>
<tr>
<td>250 sheets (A3, B4, Folio, 11 × 17&quot; (Ledger), 8 1/2 × 14&quot; (Legal), 8 1/2 × 13&quot; (Oficio II))</td>
</tr>
<tr>
<td>Stapling (80 g/m² or less) For stapling of 2 to 4 sheets: 130 sheets</td>
</tr>
<tr>
<td>For stapling of 5 sheets or more: 250 sheets</td>
</tr>
</tbody>
</table>

**Names of Parts**

1. Finisher tray
2. Process tray
3. Process tray extension
4. Finisher tray extension
5. Paper output guide 1
6. Paper output guide 2

**Notes**

- Sorted copies are output onto the finisher tray.
- According to the paper size, adjust the finisher tray extension.
• The paper sizes are marked on the finisher tray extension. Open paper output guide 1 or 2 according to the paper size.

• When stapling large paper such as A3, B4, 11 × 17” (Ledger), and 8 1/2 × 14” (Legal), open the process tray extension to prevent the paper from dropping.

Adding Staples

1 Open the stapler front cover toward your side.

2 Pull out the staple holder.

3 Remove the empty staple cartridge from the staple holder.
4 While holding the staple holder with one hand and the new staple cartridge with the other hand, insert the cartridge into the holder with care about the direction.

**Note** The arrow on the staple cartridge indicates the insertion direction.

5 Push the staple cartridge all the way into the holder and remove the paper tape around the staple cartridge by pulling it.

6 Insert the staple holder into the insertion slot as it was. Insert it completely until it clicks.

7 Close the stapler front cover.

**Clearing Staple Jam**

1 Remove the staple holder in the same way as described in *Adding Staples.*

   Hold knob A of the face plate of the staple holder with your fingers and raise the plate.
2 Remove the staple jammed at the end (side on which staples are set).

3 Lower the face plate of the staple holder to its original position.

4 Insert the staple holder into the insertion slot as it was. Insert it completely until it clicks.

5 Close the stapler front cover.

**Job Separator**

This unit is used to separate paper output destinations for easy classification. Copies are output to the output tray, and printer output is ejected onto the job separator tray. Also the output destinations can be specified.

On the front side of the machine, a paper indicator is provided for showing that there is paper on the job separator tray.

**Important!**

- Note that a paper jam may occur at the output section due to paper curling depending on the paper type.
- If finished papers come out curled or are stacked unevenly, turn the paper in the cassette over and set it again.

**Notes**

- To output paper onto the job separator, change the setting in the machine default settings (copier) or the paper settings (printer). (For details, refer to Chapter 2 in Advanced Operation Guide, Output Destination or Chapter 3 in Advanced Operation Guide, Copy Output Destination.)
- When removing paper from the job separator tray, pull it at an angle so that any corner of the paper is not hit.
Optional Equipment

Key Counter

The key counter is used to confirm the amount of usage of the copier functions. It is useful in managing copier usage for each department, section, etc. as well as in the company overall.

Setting the Key Counter

Set the key counter securely in the key counter slot.

Note

In the case where the key counter is used, no one will be able to make copies until it is installed in the machine. Insert key counter will be displayed when the key counter has not been securely inserted.

Fax Kit

If the fax kit is installed in this machine, you can use this machine as a facsimile machine. Also if the optional network scanner kit is used together, this machine can be used as a network fax with which data can be transmitted and received through a computer. For details, refer to the Operation Guide for the fax kit.

Network Scanner Kit

If the network scanner kit is installed in this machine, you can use this machine as a network scanner. For details, refer to the Operation Guide for the network scanner kit.
Optional Equipment

Memory Card (CompactFlash)

The memory card is a microchip card to which optional fonts, macros, and forms can be written. Insert the memory card into the memory card slot located on the right side of the machine.

Hard Disk

The hard disk is used for storage of print data of printer. To use all the e-MPS functions, the hard disk must be installed. (For details on the e-MPS functions, refer to Chapter 2 in Advanced Operation Guide, e-MPS Function.)

Note
Capacity: 512 MB, 1 GB, 2 GB, 4 GB

Additional Memory

A memory can be added for the copier functions and the printer functions respectively. Adding a memory will increase the maximum number of originals that can be scanned at one time. Also complicated data can be printed. An additional memory of 64 MB or 128 MB is effective for originals containing photos with a low compression ratio.

Notes
- Available memory
  For copier: 16 MB, 32 MB, 64 MB, 128 MB
  For printer: 32 MB, 64 MB, 128 MB, 256 MB
- Number of originals that can be scanned (A4 originals with 6 % coverage, Text + Photo mode)

</tbody>
</table>

The values within ( ) are those for the machine with the optional network scanner kit installed.
Optional Equipment

The locations for attaching options are shown below.

Available Options

The following options are available for this machine.

- Document Processor
- Additional Memory
- Hard Disk
- Duplex Unit
- Key Counter
- Fax Kit
- Network Scanner Kit
- Finisher
- Job Separator
- Paper Feeder
- Memory Card (CompactFlash)
Document Processor
This equipment automatically feeds and scans multiple-sheet originals one by one. Up to 50 originals can be set at one time. Two-sided originals are automatically turned over so that both sides can be scanned.

Paper Feeder
Cassettes the same as the cassette provided with the main body (300-sheet cassette) can be added below the cassette of the main body. The method of loading paper is the same as for the cassette in the main body.

Duplex Unit
Two-sided copies can be made when the duplex unit is installed.

Finisher
The finisher stores a large quantity of copies and can sort multiple copy sets by shifting the position of ejection for each one. It can also staple collated copy sets.

Job Separator
This unit is used to separate paper output destinations for easy classification. Also the output destinations can be specified.

Key Counter
The key counter is used to confirm the amount of usage of the copier functions. It is useful in managing copier usage for each department, section, etc. as well as in the company overall.

Fax Kit
If the fax kit is installed in this machine, you can use this machine as a facsimile machine. Also if the optional network scanner kit is used together, this machine can be used as a network fax with which data can be transmitted and received through a computer.

Network Scanner Kit
If the network scanner kit is installed in this machine, you can use this machine as a network scanner.

Memory Card (CompactFlash)
The memory card is a microchip card to which optional fonts, macros, and forms can be written.

Hard Disk
The hard disk is used for storage of print data of printer. To use all the e-MPS functions, the hard disk must be installed.

Additional Memory
Adding a memory will increase the maximum number of originals that can be scanned at one time. Also complicated data can be printed.
5 Maintenance

Cleaning the Machine

Caution

For safety purposes, always remove the power plug from the outlet when performing cleaning operations.

Cleaning the Original Cover

Open the original cover and wipe the back side of the cover with a soft cloth dampened with alcohol or mild neutral detergent.

Important! Never use thinner or other organic solvents.

Cleaning the Platen

Open the original cover and wipe the platen with a soft cloth dampened with alcohol or mild neutral detergent.

Important! Never use thinner or other organic solvents.
Cleaning the Slit Glass

If copies appear soiled, such as black lines appearing on the copy image while using the optional document processor, the slit glass A is dirty. Wipe the slit glass with a dry soft cloth.

Important! Never use water, thinner, organic solvents or alcohol.

Note For cleaning the inside of the main body, see Replacing the Toner Container and the Waste Toner Box on page 5-5.

Cleaning the Separation Needle

1. Open the front cover.

2. Remove the cleaning brush.

3. Pull the left cover handle up to open the cover.
4 Move the brush from the left side to the right side along the separation needle as shown in the illustration to remove any dirt or dust.

5 Close the left cover.

Cleaning the Transfer Roller

1 Open the front cover.

2 Remove the cleaning brush.

3 Pull the left cover handle up to open the cover.
4 While turning the left transfer roller gear to turn the roller as shown in the illustration, move the brush from the left side to the right side along the roller to remove any dirt or dust.

5 Close the left cover.
Replacing the Toner Container and the Waste Toner Box

When message **Unable to copy. Please Add Toner** [Cannot copy. Add toner, resume copying.] is displayed on the message display and the machine stops, add toner. Replace the toner container together with the waste toner box.

**Notes**

Add toner only when **Add Toner** is displayed on the message display.

Whenever the toner container is changed, be sure to carry out the procedure described from step 7 on page 5-7 through step 11 on page 5-8. If any section is left dirty, the performance of this product cannot be maintained.

**Caution**

Do not attempt to incinerate the toner container or the waste toner box. Dangerous sparks may cause burns.

**Caution**

Do not attempt to force open or destroy the toner container or the waste toner box.

1. Open the front cover.

2. While pushing the waste toner box holder to the left, remove the waste toner box.

**Important!** Do not invert the old waste toner box.
3 Use the cap attached to the center of the old waste toner box to cover the opening.

4 Turn the toner container release lever A to the left to pull out the toner container.

---

**Warning**

High voltage is present in the charger section. Take sufficient care when working in this area, as there is a danger of electrical shock.

**Caution**

Do not attempt to incinerate the toner container or the waste toner box. Dangerous sparks may cause burns.

**Caution**

Do not attempt to force open or destroy the toner container or the waste toner box.

5 Place the old waste toner box in the plastic bag provided for disposal.
6 Place the old toner container in the plastic bag provided for disposal.

7 While holding the charger cleaner rod, gently pull it out as far as it will go and push it in again. Repeat this operation two or three times.

**Note** Do not use excessive force to pull the rod or attempt to pull it out completely.

8 While pushing the electrical charge section to the right, pull it out approximately 5 cm (2 inches).

9 Remove the accompanying grid cleaner from its package and remove its cap.

10 Fit the grid cleaner to the notch and install it into the main body.
11  (16/20 ppm model)
While holding gently the grid cleaner with your left hand, pull out the electrical charge section as far as it will go and push it back until the portion B does not touch the white pad of the grid cleaner.
Repeat this operation several times.

(25 ppm model)
While holding gently the grid cleaner with your left hand, pull out the electrical charge section as far as it will go and push it back until the roller C does not touch the white pad of the grid cleaner.
Repeat this operation several times.

Important! When pushing back the electrical charge section, do not push it all the way into the main body. Copying trouble may occur.

12 When the electrical charge section is pulled out approximately 5 cm (2 inches), remove the grid cleaner and then push back the electrical charge section all the way into the main body.

Important! After you use the grid cleaner to clean the electrical charge section, the machine can be used again after more than 5 minutes have elapsed.

13 Hold the new toner container vertically and tap the upper part five times or more.
Turn the toner container upside down and tap the upper part five times or more.

14 Shake the toner container up and down five times or more.
Turn the toner container upside down and shake it five times or more.
15 Hold the toner container horizontally and shake it from side to side five times or more.

16 Insert the knob, which comes with the toner container, into the middle white gear of the drive section located at the back of the container.

17 Turn the knob clockwise, as indicated by the arrow, completely two or three times.

**Important!** Do not turn the knob counterclockwise, in the opposite direction of the arrow, since it may cause a problem. When the toner is shifted to one side, it will be impossible to turn the knob manually. In this case, repeat procedures 13 thru 15 above.

18 Pull out the knob.

19 Set the new toner container and turn the toner container release lever C to the right.

20 Install the new waste toner box.
Close the front cover.

After use, always dispose of the toner container and the waste toner box in accordance with Federal, State and Local rules and regulations.

**Note** In order to ensure the best copying quality, in addition to the cleaning done when changing the toner container, regularly (about once per month) carry out step 7 on page 5-7 and step 4 on page 5-4.
# Troubleshooting

If Trouble Occurs

If trouble occurs with this machine, carry out the items indicated below. If the trouble persists, contact your service representative.

| **Memory card error Insert again.** | The memory card is accidentally removed during printer setting. Insert the memory card.  
**Note** When inserting the memory card, turn the main power switch off (O). | — |
| **Insert same memory card** | When the machine has tried to read data from the memory card, it cannot recognize the memory card. Insert the memory card again.  
**Note** When inserting the memory card, turn the main power switch off (O). | — |
| **Format error Memory card** | The memory card inserted in the machine must be formatted. Format the memory card. | — |
| **Print overrun Press GO.** | Printing has not been performed properly because of insufficient memory. Press the Printer key to display the following messages.  
GO: Continues printing.  
CANCEL: Cancels printing.  
RESET: Resets the printer board. In this case, only the printer functions will be reset. Press the ▲ key or the ▼ key to select the desired processing and press the Enter key.  
**Notes**  
• If the auto continue setting has been turned on, printing will be automatically resumed after a preset period of time.  
• After this error message is displayed, the page protect mode will be automatically turned on. | — |
| **Interface occupied** | The selected interface is currently being used. Wait for a while and retry. | — |
| **Checksum Error** | The machine has detected an error at startup. Turn off the main power switch and on again. If the same message appears, contact your service representative or authorized service center. | — |
| **(25 ppm model only) Check the Toner Container.** | The toner inside the container shifts to one side. Refer to the procedures 16 and 17 on page 5-9 to turn the gear of the toner container. | 5-9 |
Troubleshooting

Paper Jams

If a paper jam occurs, copying or printing stops. At this time, jam location indicators are displayed as well as an error message indicating a paper jam. Leave the main power switch on ( ) and refer to Removal Procedures on page 6-9 to remove the jammed paper.

† For the 16 ppm model, cassettes 2 to 4 are included in the optional paper feeder. For the 20 ppm model and the 25 ppm model, cassettes 3 and 4 are included in the optional paper feeder.
Notes

**Warning**

High voltage is present in the charger section. Take sufficient care when working in this area, as there is a danger of electrical shock.

**Caution**

The fixing unit is extremely hot. Take sufficient care when working in this area, as there is a danger of getting burned.

- Do not reuse jammed paper.
- If paper is torn during removal, be sure to remove any loose scraps of paper from inside the machine. Failure to do so may cause another paper jam later.
- Once all jammed paper has been removed, warm-up will begin. The error message will disappear and the machine will return to the same settings as prior to the paper jam.

Removal Procedures

**Paper Jam inside Cassette 1**

If paper misfeed in cassette 1. Remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the cassette. Perform the following procedure to remove the jammed paper.

1. Pull out the cassette.

2. Remove any jammed paper without tearing it.

**Note**

If the paper does happen to tear, remove any loose scraps from inside the machine.
3  Push the cassette back in firmly.

Notes
- Check to see if paper is out of position in the cassette. If the paper is out of position, set the paper properly.
- If JAM21 is displayed, remove the jammed paper referring to Paper Jam in the Left Cover on page 6-12.

Paper Jam inside Cassettes 2 to 4

If Paper misfeed in cassette 2 (to 4), Remove paper Misfeed in paper cassette 2 (to 4). Remove paper and Paper misfeed. Open left cover 2 (to 4) and remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the optional paper feeder. Perform the following procedure to remove the jammed paper.

Note  For the 16 ppm model, cassettes 2 to 4 are included in the optional paper feeder. For the 20 ppm model and the 25 ppm model, cassettes 3 and 4 are included in the optional paper feeder.

1  Open the left cover of the cassette being used.

2  Remove any jammed paper without tearing it.

Note  If the paper does happen to tear, remove any loose scraps from inside the machine.
3 Close the left cover of the cassette.

4 Pull out the cassette.

5 Remove any jammed paper without tearing it.

Note If the paper does happen to tear, remove any loose scraps from inside the machine.

6 Push the cassette back in firmly.

**Paper Jam in the Multi-Bypass Tray (JAM10)**

If paper misfeed in stack bypass. Remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the multi-bypass tray. Perform the following procedure to remove the jammed paper.

1 Remove all of the paper remaining in the multi-bypass tray.
Troubleshooting

2 Reset the paper in the multi-bypass tray. The error message disappears.

Paper Jam in the Multi-Bypass Tray (except JAM10)

Important!
- If JAM20 is displayed, remove the jammed paper referring to Paper Jam in the Left Cover.
- If JAM40 is displayed, remove the jammed paper referring to Paper Jam in the Left Cover.
- When removing jammed paper, do not pull it out from the multi-bypass tray side.

Paper Jam in the Left Cover

If Paper misfeed. Open left cover and remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the left cover. Perform the following procedure to remove the jammed paper.

Important! The drum section inside the main body is sensitive to scratches and contaminants. When removing paper, be careful not to touch it or scratch it with your watch, ring, etc.

1 Pull the left cover handle up to open the left cover.

Caution

The fixing unit is extremely hot. Take sufficient care when working in this area, as there is a danger of getting burned.
2 Remove any jammed paper without tearing it.

(25 ppm model only)

If paper is left between the drum cover A and the drum as shown in the illustration, remove the paper from the lower side (in the direction indicated by the arrow). Note that if you try to remove the paper by force from the upper side of the drum cover A, the drum cover A may be damaged.

Note If the paper does happen to tear, remove any loose scraps from inside the machine.

3 If the optional duplex unit is installed, raise the duplex unit and remove any paper.

Note If the paper does happen to tear, remove any loose scraps from inside the machine.

4 Close the left cover.

Paper Jam in the Paper Output Slot

If Paper misfeed in Eject section Remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the paper output slot. Perform the following procedure to remove the jammed paper.

Important! The drum section inside the main body is sensitive to scratches and contaminants. When removing paper, be careful not to touch it or scratch it with your watch, ring, etc.
1. If jammed paper is seen through the paper output slot, pull it out to remove it.

   **Note** If the paper does happen to tear, remove any loose scraps from inside the machine.

2. Pull the left cover handle up to open the left cover.

3. Remove any jammed paper without tearing it.

   **Note** If the paper does happen to tear, remove any loose scraps from inside the machine.

4. Close the left cover.

**Paper Jam in the Optional Document Processor**

If `Misfeed in DP. Remove original(s)` appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the optional document processor. Perform the following procedure to remove the jammed original(s).
1. Remove all of the originals remaining in the original table.

2. Open the left cover.

3. Remove any jammed original without tearing it.

   **Note** If the original does happen to tear, remove any loose scraps from inside the document processor. Failure to do so may cause another paper jam later.

4. Raise the paper feed unit A.

5. Remove any jammed originals without tearing them.

   **Note** If the original does happen to tear, remove any loose scraps from inside the document processor.
Troubleshooting

6 Turn the dial as shown in the illustration to remove the jammed original.

7 Close the left cover to its original position.
Reset all the originals and start copying again.

Paper Jam in the Optional Finisher

If Paper misfeed in Finisher, lower Process Tray and remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the optional finisher. Perform the following procedure to remove the jammed paper.

Important! The drum section inside the main body is sensitive to scratches and contaminants. When removing paper, be careful not to touch it or scratch it with your watch, ring, etc.

1 Turn the lever to lower the process tray.

2 Remove any paper.

3 Raise the process tray.
4 Remove the finisher tray.

5 Pull the left cover handle up to open the left cover.

6 Remove any jammed paper.

**Note** If the paper does happen to tear, remove any loose scraps from inside the machine.

7 Close the left cover.

8 Reattach the finisher tray.

9 Lower the process tray temporarily and return it. The error message disappears.
Paper Jam in the Optional Job Separator

If paper misfeed at Job separator. Remove paper appears and the jam location indicator shown in the illustration blinks, a paper jam has occurred in the optional job separator. Perform the following procedure to remove the jammed paper.

**Important!** The drum section inside the main body is sensitive to scratches and contaminants. When removing paper, be careful not to touch it or scratch it with your watch, ring, etc.

1. If jammed paper is seen through the paper output slot of the job separator, pull it toward your side to remove it.

**Note** If the paper does happen to tear, remove any loose scraps from inside the machine.

2. Pull the left cover handle up to open the left cover.

3. Remove any jammed paper without tearing it.

**Note** If the paper does happen to tear, remove any loose scraps from inside the machine.

4. Close the left cover.
